Akshay Joshy

Software Developer

Ernakulam, Kerala | +91 9207185463 | akshayjoshy1611@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Software Developer with about 3 years of experience across full-time and freelance work, building web applications with React, TypeScript, Remix, Tailwind CSS, and MongoDB, including an enterprise ESG and sustainability platform delivered with a Dubai-based Agile team. Hands-on experience with Java, Spring Boot, Spring Security, MySQL, RESTful APIs, and JWT authentication through full-stack projects. Seeking React, Frontend, or Full-Stack Developer roles.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript, Remix, React Native, Tailwind CSS, HTML, CSS

Backend: Java, Spring Boot, Hibernate, RESTful API Development, Spring Security

Database: MySQL, MongoDB

Authentication & Security: JWT, Role-Based Access Control (RBAC) , Google Sign-In (OAuth)

Tools & Platforms: GitHub, Bitbucket, Postman, Jira

WORK EXPERIENCE

SAM CORPORATE | Aug 2023 – Jun 2025 | Ernakulam, Kerala

Software Developer

- Worked on an ESG and sustainability management platform that enabled enterprises to manage, track, assess, and report environmental, social, and governance performance.
- Developed and maintained application features using React, Remix, TypeScript, and MongoDB, contributing to both user-facing functionality and server-side application logic.
- Implemented Remix loaders and actions for data fetching, form handling, API integration, validation, and server-side application workflows.
- Built responsive and reusable UI components using React and Tailwind CSS for ESG assessments, data management, dashboards, and reporting workflows.
- Worked on application routing, data handling, validation, and frontend–backend integration within the Remix application.
- Contributed to functionality covering materiality assessments, sustainability data, emissions-related calculations, value-chain assessments, governance/social evaluations, and ESG reporting.
- Collaborated with the Dubai-based team on requirement gathering, feature development, testing, and delivery within an Agile environment.

ABDIAS HEALTHCARE | Jul 2025 – Oct 2026 | Ernakulam, Kerala

Freelance Software Developer

- Developed the frontend of a healthcare management system using React.js and Tailwind CSS, supporting patient, doctor, employee, lead, invoicing, and operational workflows.
- Built responsive dashboards and reusable UI components across multiple healthcare management modules.

- Implemented frontend role-based access control (RBAC), protected routes, and permission-based navigation using dynamic parent-child menu structures.
- Developed interfaces for patient management, employee attendance, doctor and employee management, lead tracking, and invoicing/billing workflows.
- Integrated frontend functionality with backend APIs**,** implementing reusable forms and centralized validation while collaborating with the backend developer to ensure reliable data flow and feature integration.

PROJECTS

Vocara – Interview Practice Mobile Application | Personal Project | 2026 – Present
React Native, TypeScript, Java, Spring Boot, MySQ**L**

- Built a full-stack mobile application for interview practice, supporting custom question sets, timed practice sessions, and text, speech-recognized, and recorded-audio answers.
- Developed the mobile application using React Native, TypeScript, React Navigation, Axios, and TanStack React Query, with reusable components, API hooks, form validation, localization, and theme management.
- Developed RESTful APIs using Java and Spring Boot with layered Controller-Service-Repository architecture, DTO validation, Spring Data JPA/Hibernate, and MySQL persistence.
- Implemented email/password and Google Sign-In authentication, including Google ID-token verification, account linking, BCrypt password hashing, application JWT issuance, and JWT revocation through token blacklisting.
- Implemented question-set, question-bank, interview-session, answer, and audio workflows, including audio upload, speech recognition, session tracking, and user-scoped data access.

EduTenant – Multi-Tenant School Management System | Personal Project | 2026
React, Java, Spring Boot, MySQL

- Built a multi-tenant school management system with workspace-based data isolation for managing academic years, classes, subjects, users, roles, and permissions.
- Developed RESTful APIs using Java and Spring Boot with Spring Security, Spring Data JPA/Hibernate, DTOs, validation, and MySQL persistence.
- Implemented separate admin and workspace-user authentication flows using JWT, BCrypt password hashing, HTTP-only cookie-based token refresh, and OTP-based password recovery.
- Developed workspace administration features for user management, invitations, roles, modules, and permissions, with permission-aware frontend routing and UI controls using React.
- Built academic management workflows for academic years, calendar events, classes, sections, subjects, and class-subject assignments, including file upload and browser-based spreadsheet preview functionality.

EDUCATION

Bachelor of Technology in Computer Science and Engineering | 2018 – 2022

Sree Narayana Gurukulam College of Engineering, Kadayiruppu

TRAINING & CERTIFICATIONS

Java Spring – Full-Stack Development | Luminar Technolab

- Learned and worked with Java, Spring Boot, HTML, CSS, JavaScript, and MySQL.
  Used Postman for API testing and Git for version control.
