PROFESSIONAL SUMMARY

Ambitious and driven Computer Science Engineering graduate with hands-on experience in full-stack web development, specializing in React and Java. Experienced in building scalable, user-friendly, and data-driven applications using React, TypeScript, JavaScript, Remix, Java, Spring Boot, Hibernate, MySQL, and MongoDB. Experienced in developing frontend and backend solutions, integrating REST APIs, implementing authentication and role-based access control, and working with databases and modern web technologies. Passionate about writing clean, maintainable code, solving technical problems, and building practical software solutions.

TECHNICAL SKILLS

Languages : Java, JavaScript,TypeScript, HTML,CSS.
Frontend : React.js,React Native,Tailwind CSS,Remix.
Backend : Java**,**Spring Boot,Hibernate,REST API Development.
Database : MYSQL,MongoDB.
Authentication & Security: JWT, Role-Based Access Control (RBAC)
Tools & Platforms : Github,Bitbucket,VS Code,STS,Postman,Jira.
Other : Nodemailer Integration,Agile Collaboration,Cross Functional Team Work.

WORK EXPERIENCE

SAM CORPORATE

Aug 2023 - Jun 2025
Kochi, Kerala

Software Developer

- Worked on an Environment, Social, and Governance (ESG) platform designed to help enterprises manage, track, and report ESG-related data and compliance requirements.
- Developed and maintained application features using React, Remix, TypeScript, and MongoDB, contributing to both user-facing functionality and server-side application logic.
- Implemented Remix loaders and actions for data fetching, form handling, API integration, and server-side application workflows.
- Built responsive and reusable UI components using React and Tailwind CSS.
- Worked on application routing, data handling, validation, and integration of frontend and backend functionality within the Remix application.
- Collaborated with the Dubai-based team for requirement gathering, feature development, testing, and delivery in an Agile environment.
- Contributed to improving application usability, maintainability, and overall platform performance.

PROJECTS

Abdias Healthcare – Healthcare Management System

Freelance Project | 2025–2026

- Developed the frontend of a comprehensive healthcare management system using React.js and Tailwind CSS for managing patients, doctors, employees, leads, invoicing, and operational workflows.
- Implemented responsive dashboards and reusable UI components for different healthcare management modules.
- Developed secure frontend role-based access control (RBAC) and protected route handling based on user permissions.
- Implemented dynamic sidebar navigation with parent-child menu hierarchy based on assigned modules and permissions.
- Developed employee attendance interfaces with check-in/check-out functionality and location data capture.
- Built patient management interfaces covering registration, profile management, medical updates, and treatment tracking.
- Developed doctor and employee management screens for profile management and operational assignments.
- Implemented invoicing and billing interfaces with create, edit, and reporting functionality.
- Developed lead management interfaces for tracking healthcare inquiries and follow-ups.

- Created reusable form components and centralized frontend validation logic to improve maintainability and consistency.
- Integrated frontend functionality with backend APIs and worked closely with the backend developer to ensure smooth data flow and feature integration.

Vocara – AI Interview Practice & Coaching Platform
Personal Project | 2026

- Developed a full-stack AI interview practice platform designed to help users practice speaking, answering interview questions, and improve their interview performance.
- Built the application using React Native with TypeScript for the mobile frontend and Java Spring Boot for the backend.
- Implemented customizable interview question sets across categories such as General, HR, Technical, Behavioral, and language practice.
- Developed practice workflows supporting both speaking and typing-based answers, allowing users to simulate interview sessions.
- Implemented speech recognition functionality for voice-based interview practice and answer capture.
- Developed result and feedback workflows displaying questions answered, skipped questions, response details, and areas for improvement.
- Implemented user authentication with Google Sign-In and backend token validation.
- Built REST APIs using Spring Boot with MySQL database integration.
- Designed the application with reusable components and a scalable frontend/backend architecture.

EduTenant – Multi-Tenant School Management System
Personal Project | 2025

- Implemented a workspace-based multi-tenant architecture allowing multiple schools to operate independently within a single application.
- Developed secure authentication and authorization using JWT and Role-Based Access Control (RBAC).
- Built academic management modules for Academic Year, Class, Section, Subject, and Teacher Assignment.
- Developed responsive administrative dashboards for managing academic structures, users, and permissions.
- Implemented dynamic navigation and menu rendering based on user roles, assigned modules, and permissions.
- Developed reusable React components using React and Tailwind CSS.
- Built paginated and filterable APIs with search, sorting, and academic-year filtering.
- Implemented hierarchical parent-child menu management with module-based access control.
- Developed RESTful CRUD APIs with validation, conflict handling, and workspace-level security.

ESG (Environment, Social, and Governance)
SAM Corporate | 2023

- Contributed to a full-stack ESG compliance and reporting platform using React, Remix, TypeScript, and MongoDB.
- Built responsive and interactive interfaces using React and Tailwind CSS.
- Implemented application workflows using Remix loaders and actions for data fetching, form processing, and server-side operations.
- Worked on routing, API integration, data handling, validation, and server-side rendering within the Remix application.
- Collaborated with the development team to deliver features according to business requirements.

EDUCATION

Bachelor Of Technology Computer Science And Engineering **2018- 2022**
SreeNarayanaGurukulamCollegeOfEngineering , Kadayiruppu CGPA - 6.20

CERTIFICATES

Java Spring - FullStackDevelopment(LuminarTechnolab) | Intern **2023**

- Learned and worked with Java, Spring Boot, HTML, CSS, JavaScript, and MySQL.
- Used tools like Postman for testing and Git for version control.
